

CASTER CONCEPTS Beyond Standard.

HEAVY DUTY CASTERS

Whether it's a 4,000lb load, a 200,000lb load, or greater, you can rely on Caster Concepts to provide the exact caster for the application. We offer a full line of heavy duty casters & wheels including swivel & locking casters, designed for industrial applications. We have built heavy duty casters for use on carts, racks, airplane platforms, rail cars, steel haulers and many more applications that required a caster that is "Beyond Standard".

ERGONOMIC CASTERS & WHEELS

Caster Concepts has developed a complete line of ergonomic casters, wheels and related accessories for companies, engineered to reduce initial, continuous and turning push/pull force. Products range from our patented TWERGO® wheels that achieve unrivalled force reduction, to the Drive Caster®, the first motor powered industrial caster that can move extremely heavy loads effortlessly.

CUSTOM SOLUTIONS

Whether the need is for a unique solution to a very unique challenge, or simply modifying a caster out of our catalog, we can EASILY accommodate your custom requirements. All of our casters are built-to-order and to exact specifications. Our flexible manufacturing and engineering process enables us to build exactly what is needed for the application.

THE LEADER IN INDUSTRIAL CASTER & WHEEL SOLUTIONS FOR VIRTUALLY EVERY INDUSTRY
